PROGRAM OVERVIEW

The Language Interpreter Training Certificate program is intended to provide bilingual learners who wish to work as spoken language interpreters in the legal, health-care and social service fields, with the skills and knowledge necessary to deliver effective interpreter services.

This 180-hour certificate program (six, 30-hour credit courses) provides participants with training in Standards of Practice and Ethical Principles, which underlie interpreting services while focusing on the skills necessary to provide interpretation in various forms primarily focusing upon consecutive, simultaneous and whispered simultaneous interpreting, sight translation, note taking, telephone protocol and their application in various settings. By exposing participants to relevant situations, learners have the opportunity to apply their skills and consolidate their knowledge thereby demonstrating their abilities to effectively provide introductory level interpreting services.

Students entering this program must be fully bilingual in English and a second language.
